Technical Skills

Testing: Manual, Exploratory, Smoke, Sanity, Regression, Integration, System, UAT, API, Performance, Security, Mobile Testing, Web App Testing
Automation: Playwright, Selenium, WebdriverIO, Appium, TestNG, JUnit, POM, BDD/Cucumber, DDT
Languages: Java, JavaScript, Python, SQL
Tools: Postman, Swagger, JMeter, Grafana k6, Burp Suite, Jira, TestRail, Notion, Asana, Clickup, Jenkins, GitHub Actions, Azure DevOps, Git, Bitbucket
AI: Claude Code, Cursor, Codex, Gemini, n8n, Self-built AI Agents

Experience

SQA Trainee May 2026 – Sept. 2026
VentureDive

- Tested 3 core products of **MinglEat**, a social dining platform, from discovery to release, validating responsiveness against Figma designs
- Developed **Playwright** (JS) UI scripts and **Postman** API suites, cutting regression time to 3 days
- Mocked API responses with browser DevTools to validate frontend behavior across edge cases and server states
- Integrated **TestRail** with Playwright and CI/CD pipelines for real-time execution reporting, and authored Jira test cases
- Retested Ready for QA fixes on **Careem** and ran ad-hoc, sanity and API testing on **Vendian**, an in-house HR platform

SQA Engineer July 2025 – May 2026
Co-Ventech

- Designed and maintained **Page Object Model** frameworks with WebdriverIO and Playwright, making tests easier to reuse and scale
- Developed modular, **data-driven test cases** with TestNG and JUnit (Java), improving test organization and reporting
- Set up **CI/CD pipelines** in GitHub Actions and Azure DevOps to automate test runs, with Slack and email build alerts
- Performed API testing with Postman, **performance testing** with JMeter and basic **security testing** with Burp Suite
- Managed end-to-end manual and automated testing of web and mobile apps, tracking bugs in Notion with developers

AI Associate Intern June 2025 – July 2025
National Foods Limited

- Deployed a **RAG-based** IT support chatbot trained on company datasets, boosting query-resolution efficiency by 40%
- Implemented a RAG pipeline on internal documents, improving knowledge-retrieval speed by 80%

Projects

ConstructHub (Final Year Project) | *React.js, Django, OpenCV, YOLOv8, MediaPipe* 2025 – 2026

- Built and tested a full-stack construction-management platform, running **functional and integration tests** across React.js/Django
- Validated a YOLOv8 + MediaPipe computer-vision module for site-safety monitoring, evaluating detection accuracy and edge cases
- Benchmarked KNN and Random Forest material-recommendation models with pandas and NumPy, using Git/GitHub

Certifications

ISTQB CTFL - Preparation | *Board Infinity - Coursera* Ongoing
Automation, Advanced Testing, and AI | *Microsoft - Coursera* Ongoing
Hands-On Web App Pentesting | *Packt - Coursera* Ongoing
Automation with Selenium WebDriver & TestNG | *10Pearls University* Sept. 2026
Application Security Testing for Absolute Beginners| *10Pearls University* Aug. 2026

Education

FAST - National University of Computer and Emerging Sciences Karachi, Pakistan
Bachelor of Science in Computer Science *2022 – 2026*
