SKILLS

Manual | Exploratory, Smoke, Sanity, Regression, Adhoc, Retesting, Design, Integration, System, UAT, Performance, Pre-Prod testing

Automation | Test Suites Generation, Automated Test Execution, POM, BDD, Data-Driven Testing, API Automation, Custom Locators & XPath, Cross-Browser Testing, Automated Smoke Suites, Automated Regression Suites, Test Script Maintenance

Framework, Tools & Technologies

- PlayWright, Selenium, Appium
- Postman, Swagger, JIRA, TestRail, JMeter, Grafana K6, Jenkins, BitBucket
- Fleet of self build AI Agents, Git/Github, Claude Code, Gemini, Codex, Cursor, n8n

EXPERIENCE

VentureDive | SQA Intern — May '26 -- Sept '26

MinglEat : Social Dining & Restaurant Booking Platform

- End-to-End Execution:Tested 3 core platform products from discovery to release, validating responsiveness against Figma designs.
- Frontend & API Automation:Developed Playwright (JS) UI scripts and Postman API tests while supporting backend automation.
- API Mocking:Used browser DevTools to mock API responses and validate frontend behavior for edge cases and server states.
- Regression Optimization:Cut regression time to 3 days by combining Playwright UI scripts with Postman API test suites.
- Manual Testing:Authored Jira test cases and executed retesting on Ready for QA (RFQ) tickets to verify defect fixes.
- AI Integration:Leveraged Cursor, Claude, and ChatGPT to accelerate test case design, script writing, and debugging.
- Pipeline & Reporting:Integrated TestRail with Playwright and CI/CD pipelines to automate real-time execution reporting.

Careem : Ride-Hailing App

- Defect Retesting:Retested "Ready for QA" bugs with Lead SQA, validating fixes across assigned builds against expected behavior.
- Tracking & Feedback:Managed defect data in Google Sheets, documenting results for direct manager reporting and fast bug closure.

Vendian : In-House HR & Workforce Management Platform

- Ad-Hoc & Sanity Testing:Performed manual ad-hoc, sanity, and Postman API testing on the HR platform to verify system stability.
- Defect Lifecycle:Logged initial bugs in tracking sheets, transferred verified issues to Jira, and retested developer fixes.

National Foods Ltd. | AI Associate Intern — June '25 -- July '25

IT Support Chatbot : RAG based chatbot that assist IT in ticket and query resolution

- AI Chatbot Deployment:Deployed an IT chatbot trained on company datasets, boosting query-resolution efficiency by 40%.
- RAG Pipeline: Implemented a RAG pipeline on internal documents, improving knowledge-retrieval speed by 80%.

PROJECTS

FYP - ConstructHub | React.js, Django, OpenCV, YOLOv8, MediaPipes, AI Algorithms

- Built and tested a full-stack construction-management platform with an interactive dashboard, executing functional and integration tests across the React.js/Django stack.
- Validated a YOLOv8 + MediaPipe computer-vision module for automated site-safety monitoring, evaluating detection accuracy and edge-case handling.
- Developed and benchmarked AI material-recommendation models (KNN, Random Forest) with pandas and NumPy while managing version control via Git/GitHub within a Waterfall SDLC.

Sales Prediction for KIA Motors | Python, Django, TensorFlow, XGBoost

- Engineered a demand-forecasting engine benchmarking 8 ML models, validating prediction accuracy against large-scale historical datasets.
- Built a secure file-upload system with multi-stage validation, ensuring 100% data integrity across dealer datasets, and authored technical documentation for API endpoints and data pipelines.

EDUCATION

FAST NUCES, Karachi | Bachelors in Computer Science — 2022 -- 2026

CGPA: 3.11/4.00
