Professional Summary

Computer Science graduate (FAST-NUCES) with strong Object-Oriented Programming fundamentals and hands-on Software Quality Assurance experience across multi-portal web platforms. Proficient in Python, Java, and C#, with practical exposure to manual and automated testing using Selenium, Cypress, and Postman, plus applied experience building AI/ML and RAG systems. Pairs a developer's understanding of code with an analytical, detail-oriented testing mindset and is eager to extend automation expertise into frameworks such as Playwright.

Education

National University of Computer & Emerging Sciences (FAST-NUCES) Graduated June '26
Bachelor of Science in Computer Science *Karachi, Pakistan*

- **Relevant Coursework:** Object-Oriented Programming, Data Structures & Algorithms, Database Systems (SQL), Software Engineering, Operating Systems, Software Testing(Elective), Artificial Intelligence, Machine Learning

Experience

Software Quality Assurance Intern May 2026 – Present
VentureDive *Karachi, Pakistan*

- Tested authentication and role-based access control across a three-portal B2C social-dining platform.
- Validated API contracts using Postman and Swagger, applying pre/post-request scripting and env variables.
- Authored reproducible manual and exploratory test cases for core reservation and networking workflows.
- Performed mobile testing (Appium, Cypress) and JUnit performance testing; reported results via MCP to CQM.
- Built UI, API, and regression automation using Selenium, Cypress, Playwright (POM), and Rest Assured.
- Created and maintained test suites in TestRail, integrated with automation via MCP for auto-updates.
- Validated UI, functional, and cross-portal data consistency on an EdTech web application.
- Logged and tracked defects in Jira with precise reproduction steps.

AI Associate Intern June 2025 – July 2025
National Foods Limited – Corporate Office *Karachi, Pakistan*

- Developed and deployed an AI chatbot for the IT department, improving internal query-resolution efficiency by 40%, by training on proprietary datasets and company policies and validating response accuracy before rollout.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline to aggregate internal documents, improving knowledge-retrieval speed by 80%.

Projects

FYP – ConstructHub | *React.js, Django, OpenCV, YOLOv8, TensorFlow, PostgreSQL* Aug 2025 – June 2026

- Built and tested a full-stack construction-management platform with an interactive dashboard, executing functional and integration tests across the React.js/Django stack.
- Validated a YOLOv8 + MediaPipe computer-vision module for automated site-safety monitoring, evaluating detection accuracy and edge-case handling.
- Developed and benchmarked AI material-recommendation models (KNN, Random Forest) with pandas and NumPy; managed version control via Git/GitHub within a Waterfall SDLC.

Sales Prediction for KIA Motors | *Python, Django, PostgreSQL, TensorFlow, XGBoost* July 2025 – Dec 2025

- Engineered a demand-forecasting engine benchmarking 8 ML models, validating prediction accuracy against large-scale historical datasets.
- Built a secure file-upload system with multi-stage validation, ensuring 100% data integrity across dealer datasets, and authored technical documentation for API endpoints and data pipelines.

Technical Skills

QA & Testing: Manual & Automated Testing, Functional & Performance Testing, Regression, UI, Authentication & Role-Based (RBAC), Exploratory, Smoke, Sanity, System, E2E, Retesting, Cross Browser, UAT, Ad-hoc, α & β Testing
Testing Tools: PlayWright, Selenium, Cypress, Postman, Swagger, JUnit, Appium
Test Management & VCS: Jira, TestRail, Bitbucket, Swagger, CQM, Sonar, self-build AI Agents, Git, GitHub
AI/ML & Data: TensorFlow, LangChain, RAG, YOLOv8, XGBoost, scikit-learn, pandas, NumPy, OpenCV
AI Tools & CLI: Claude Code, Codex, n8n, Antigravity, Cursor, Prompt Engineering, CLI-based Workflows
Databases & Services: PostgreSQL, MySQL, Oracle, Pinecone, ChromaDB, AWS Cognito, AWS EC2, Vercel
